1 Purpose

This Tactics, Techniques, and Procedures will provide the detailed instructions for end-users to update their personnel information using the milConnect portal provided by the Defense Manpower Data Center (DMDC). Contact information maintained in milConnect is replicated in the Global Address List (GAL) for DISA’s Enterprise Services, including DoD Enterprise Email and DoD Enterprise Portal Service.

DMDC maintains personnel information associated with a user’s Common Access Card (CAC), which serves as the central source for data to populate the GAL. When an end-user is transitioned to a DISA Enterprise Service they will need to update their contact information, DoD Component and subcomponent. These attributes will update their GAL entry and display name within approximately 24 hours after the updates have been saved on the milConnect portal.

1.1 Audience

This document is intended for end users who utilize DISA’s Enterprise Services.
